## DETAILED ACTION

### *Response to Amendment*

1. In response to the Amendment received on July 08, 2003, the examiner has carefully considered the amendments. The examiner acknowledges the cancellation of claims 4 and 8.

### *Response to Arguments*

2. Applicant's arguments, see response, filed July 09, 2003, with respect to claims 4 and 8 have been fully considered and are persuasive. The rejection of claims 4 and 8 under 35 USC 102 (b) as being anticipated by Lamanna et al (5,554,664) has been withdrawn.

### *Allowable Subject Matter*

3. Claims 1-3 and 5-7 are allowed.

4. The following is an examiner's statement of reasons for allowance: The specific limitation as to the low thermal catalytic activities in the approximate range of 20 to 80 °C of the onium salt photoinitiator was clarified by Applicant's declaration filed March 13, 2003 which states the "low thermal catalytic activity in the approximate range of 20 to 80 °C" for the onium salts are well-known for onium compounds in the art and means that said onium salts cannot have or has substantially no catalytic activity in the range of 20 to 80 °C. This limitation is not expressly taught and/or fairly disclosed in the prior art in cationic photocatalyst composition and therefore is distinguished over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
